

# ReVolution Docking Station

## Docking Station

### Durability Features

- Designed using MIL-STD-810F test Procedures
- Brass locating pins for assured computer placement
- Floating docking connector for certain docking alignment
- Cam Slide Mechanism for easy docking engagement
- Front retainer brackets for added restraint and safety
- Pre-drilled holes provided for Cable strain relief
- Internal protected circuit boards

### Key Lock

- Knob-style lockable latch – Optional use – Keyed alike

### Port Replication

- Serial (2)
- Parallel
- USB
- PS2 – KB/Mouse
- Audio – Speaker/MIC
- RGB

### Mechanical Placement

Pre-drilled holes align with all Gamber-Johnson motion attachments

### Power

Power connector connects directly to any 10 – 24 VDC power source. Higher Voltage requirements are supported by utilizing the Kontron Mobile Computing DC to DC power converter.

### Orientation

The ReVolution Docking Station supports both operating orientations. Mount it as a traditional laptop or in the tablet pc position, making it the only docking station you'll need no matter how you'll be utilizing the ReVolution.
